

I think that it would be extremely dumb to take traffic info off of satellite radio, 1 FM and AM stations do not always come in clear and satellite does so you will never be caught in a bad situation, and 2, what is the big deal about it, if the FM stations feel threatened about this then they need to go to satellite, I feel that satellite radio, and the info that is on it is one of the best things to happen to America! Do not ban traffic and weather info from satellite radio!!!
